Product Description

Microsoft Office 2024 Home and Business Latest On-Premises Versions for Productivity

Description & Applications

Microsoft Office 2024 Home and Business gives you the latest on-premises versions of the core Office apps plus email to bring your productivity to the next level. Take advantage of the improvements in classic Word, PowerPoint, Excel, OneNote, and Outlook with the bonus of an updated look.
Office 2024 Home & Business meets the needs of home users and small businesses. It comes with new features like new Excel functions, improved accessibility, better performance, a new modern design for a more fluent and consistent user experience between apps and more innovative ways to work efficiently!
From working with complicated text documents and data-heavy spreadsheets to crafting an impressive presentation and hosting your email - **Office 2024 Home and Business** lets you do it all.

Microsoft Outlook 2024
Outlook 2024 has extra features to help you manage your mailbox, such as more meeting options, and search and accessibility improvements. The powerful search tool allows you to find messages, attachments, contacts, tasks, and calendar entries using words, phrases, operators and keywords to narrow your results. Now Outlook gives more options for managing meetings like choosing different durations, automatically shortening meetings according to length, planning breaks, etc. The tools for creating accessible content are now in one place for convenience.

Microsoft Word 2024
In Office 2024, you can easily recover your document to the latest changes if the app unexpectedly closes, allowing you to pick up right where you left off. Collaboration is even easier with modern comment features, the ability to delete all resolved comments with one click, and convenient mode switching. Word now supports OpenDocument format (ODF) 1.4, enabling multiple new features such as tables in shapes, lists from zero, non-overlapping images and shapes, decorative objects, and more.

Microsoft Excel 2024
Excel 2024 offers powerful data analysis features. It includes new text and array functions, dynamic arrays for flexible charting, and faster, more stable workbooks. You can use the new LAMBDA function to create custom functions for commonly used formulas and the IMAGE function to insert pictures without changing the formatting. There are also 14 new functions to extract and split text strings, combine, reshape, resize, and select arrays. The Dynamic Arrays in charts allow you to visualise datasets of variable length. The charts automatically update when the array recalculates. Enhanced security, such as blocking XLL add-ins, helps protect against malware.

Microsoft PowerPoint 2024
With various new features and improvements, PowerPoint 2024 is more compelling than ever. It now supports inserting a live camera feed using cameo directly on the slide and applying the same effects to it as for the other objects. You can record your presentation, including voice, ink movements, and presenter's presence, and export it as a video file. You can add MS Stream videos and benefit from the numerous PDF accessibility improvements. Working with others has never been easier, thanks to the modern commenting features enhancing the user experience.

Microsoft OneNote 2024
The personal digital notebook, OneNote, allows you to type, write, or draw notes and insert images, audio, or video clips from the web. Now, OneNote 2024 offers better navigation through your notes, enhanced Quick Notes features, a pen-focused view to minimise distraction, improved inking features and a Draw tab experience. Users can also enjoy more options for their drawing tools and better organisation of the instruments.

Requirement:

PC		MAC	
Required Processor	1.1 GHz or faster dual-core processor	Required Processor	Intel or Apple Silicon (supported by the three most recent versions of macOS)
Recommended Memory	4 GB RAM	Recommended Memory	4 GB RAM
Required Hard Disk Space	4 GB free space	Required Hard Disk Space	10 GB of available disk space

Operating System	Windows 10 and 11 (for ARM-based devices only Windows 11)	Browser	Current version of Microsoft Edge, Safari, Chrome, or Firefox
NET version	Some features may require .NET 3.5 or 4.6 and higher to be installed	NET version	not applicable
Other	Microsoft Account	Other	Microsoft Account

Features

► **New design**

Enjoy a visual refresh that enhances the user experience on both Windows 11 and Windows 10. The new design features a customisable interface and a more natural and consistent experience, within and across all applications.

► **Easier collaboration with Modern Comments**

The modern comment experience in Word and PowerPoint allows for richer collaboration and a coherent commenting experience across the Office suite. Use comments for presentation feedback, easily identify new replies with the blue dot, delete resolved comments with one click, and show support with a Like reaction.

► **Support for OpenDocument Format (ODF) 1.4**

The support for OpenDocument format 1.4 brings multiple enhancements to Word, Excel, and PowerPoint.

► **Improved search and meeting options**

Search your emails, calendar and contacts, and find effortlessly what you need. Enjoy more options when you create and manage meetings.

► **New Excel functions and faster workbooks**

Take advantage of all the novelties in Excel 2024, like Dynamic charts with dynamic arrays, more than 15 new functions, and improved speed of workbooks.

► **Improved performance**

Increase your productivity with Office 2024's enhanced performance and improved stability and speed, across all applications.

► **Enhanced built-in security**

Data protection is improved over earlier Office versions. Privacy controls ensure information remains safe and compliant with industry standards.
